## **Introduction:**

Congratulations on becoming an owner of the Welles Juice Press. Juice presses have been reported to produce some of the healthiest juice for consumption. The Welles Juice Press has been designed to be portable, easy to use, and sturdy. With a few simple operating and care instructions, your press will work efficiently for a long time.

The Welles Juice Press is intended to be used in conjunction with a juicing machine. Some people juice fruits and vegetables with their juicer, and then press the residual "pulp." Others use their juicer as a grinder, producing all "pulp" for pressing. If you do not currently own a juicer, we highly recommend the Samson Single Augur Juicer, Samson Advanced or the Green Power KPE1304 Twin Gear Juicer.

**To enjoy your experience with the Welles Juice Press and ensure long, trouble free operation, please read the instructions carefully before operating.**

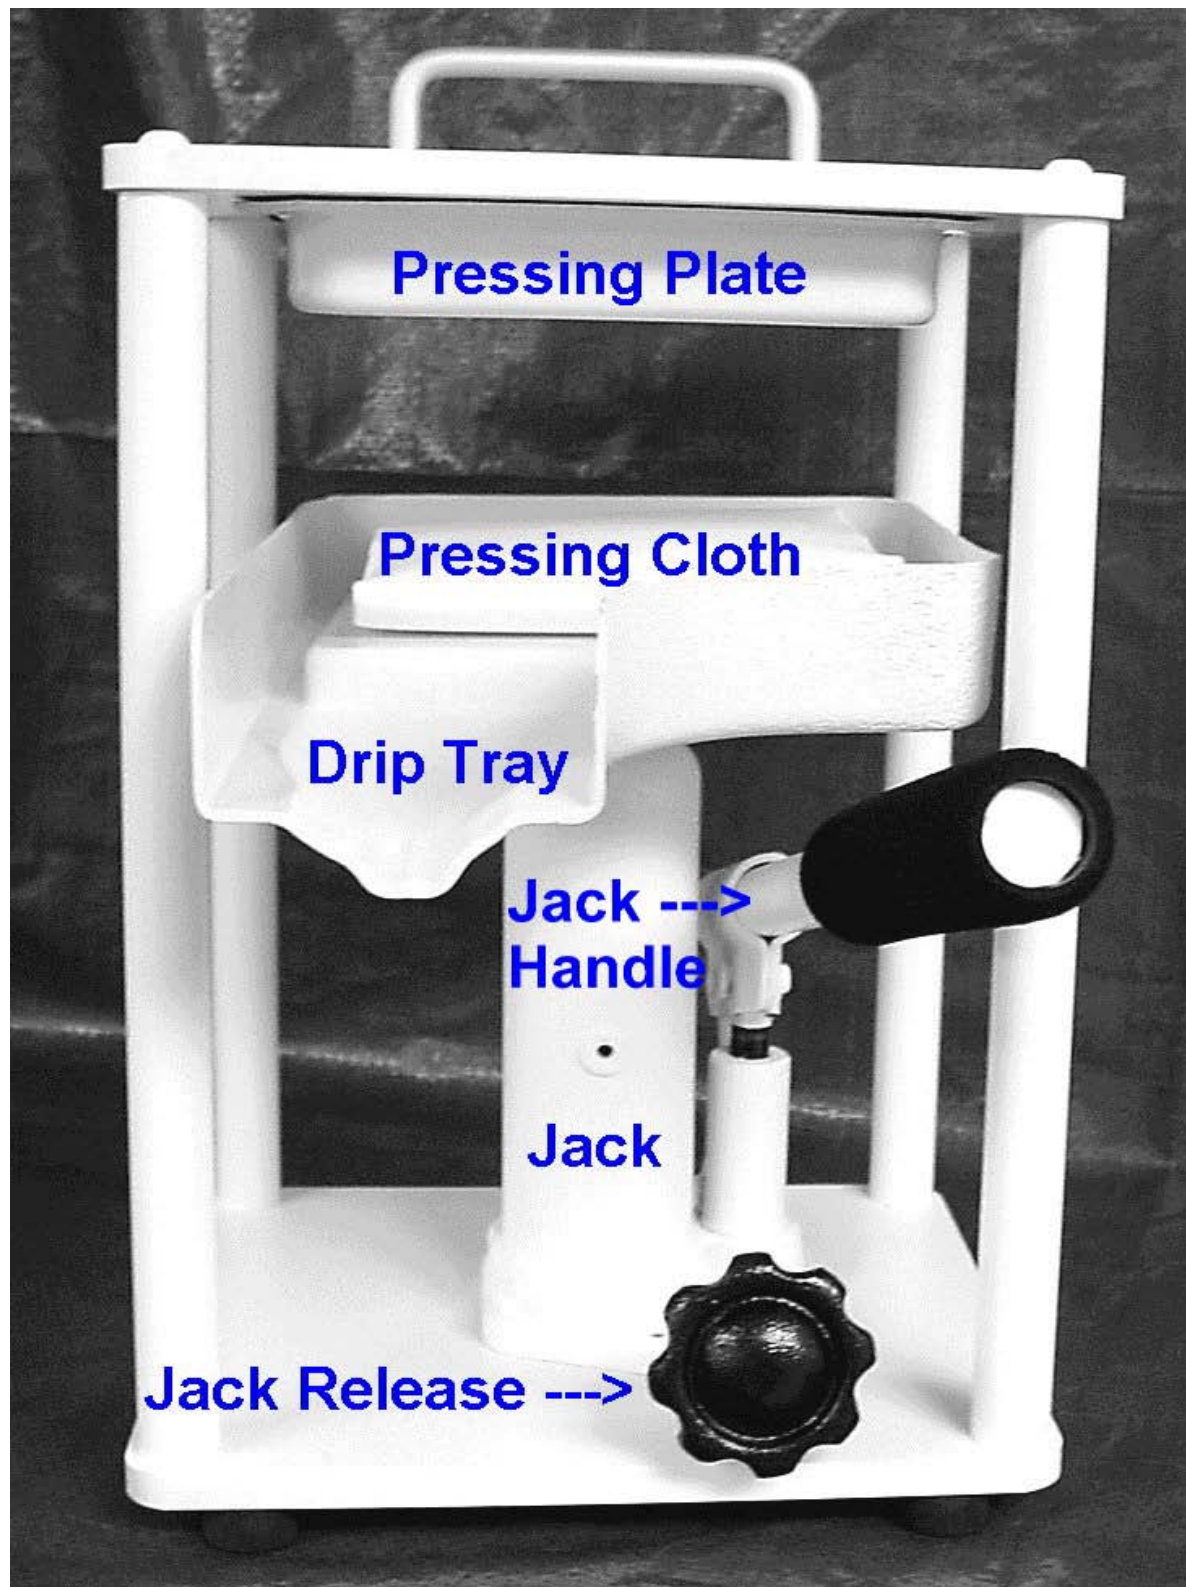

## **Thank You for choosing the Welles Juice Press!**

## Welles Juice Press Components (See Diagram on Next Page):

- **Pressing Plate** – is securely attached to the frame. It is designed to fit inside the drip tray and press the juice as the drip tray is raised by the jack.
- **Drip Tray** – made of a non-leaching plastic compound specifically designed to be used with food products. Pulp to be pressed can be placed on the tray or in pressing cloths or pressing bags. When the jack raises the drip tray to the pressing plate, juice will pour from the drip tray opening.
- **Pressing Cloths / Bags** – (2 Cloths included) – specifically designed to be used with food products. Put pulp inside the cloth (fold over). Pressing bags are simply clothes sewn on 3 sides. The cloths/bags reduce splashing and increase juice yield.
- **Jack** – 2 Ton Hydraulic Pressure
- **Jack Handle** – The handle is inserted into the jack opening at the base and is used to lift the drip tray to the juicing plate.
- **Jack Release Knob** -
  - For lifting, the knob should be turned all the way to the right.
  - For lowering, the knob should be turned up to two full turns to the left. **DO NOT TURN MORE THAN TWO FULL TURNS TO LEFT! (Counterclockwise)**

**CAUTION - Removing the Jack Release Knob will disable the jack and void the warranty.**

**Welles Juice Press Component Description**

## Operating Instructions:

- Make 1 to 2 cups of pulp with your juicer and place it on one of the juicing cloths that came with your press. After you have used the press for a while, you can adjust the quantity of pulp.
- Fold the cloth over the pulp until all sides are closed. Making the pulp pack tight will increase pressing efficiency. Overfilling the cloth will decrease pressing efficiency.
- Place the folded side down and place it in the Drip Tray.
- Place the Drip Tray on the square plate on top of the jack. The under side of the tray has an indented area that fits over the jack plate. This properly aligns the drip tray with the pressing plate.
- Make sure the Jack Release Knob is turned all the way to the right. This controls the hydraulic jack and should be finger tightened. You do not have to turn it hard.
- Place a pitcher or container under the funnel lip of the drip tray.
- Insert the jack handle into the opening at the base of the jack. Pump the handle to raise the **pulp filled** drip tray to the pressing plate. As the pulp package is squeezed, juice will begin to pour out of the funnel edge of the drip tray.
- Once the pressure starts creating juice flow, hold the handle on top of the press with one hand to stabilize the unit. Slowly increase pressure until considerable resistance is felt. Do not strain yourself or tip the press in the process.
- Unlike electrical presses, the pressure can be left on for several minutes while you prepare more pulp.
- To lower the drip tray, turn the Jack Release Knob to the left (up to two full turns) counterclockwise. This releases the pressure in the jack and you can lower the tray.

**DO NOT LOOSEN THE KNOB MORE THAN TWO TURNS, IT WILL BREAK THE PRESSURE SEAL AND DISABLE THE JUICER.**

## **Cleaning:**

Cleaning your Welles Juice Press is paramount to efficiency and operational longevity. Juice is sticky and when left to build up can inhibit operating efficiency and cause damage. Cleaning your Welles Juice Press is fairly simple and doesn't take a lot of time. You should clean it whenever you're not going to be using it; basically after each pressing session.

A moist cloth, paper towel or sponge is generally all you need to clean the press. Using a 50/50 solution of water and white vinegar can help effectively clean the press. The drip tray is **not dishwasher safe**, but can go on the top shelf during the wash cycle. The high temperatures of the drying cycle could potentially warp the tray. Do not allow remaining pulp or dried juice to build up; this can be a breeding place for bacteria. A 50/50 bleach and water mixture can be used to sterilize your Press. Make sure to rinse thoroughly to remove any residual bleach.

The pressing cloths can be used many times and proper care will ensure a long life. After the cloths have been rinsed thoroughly, put them in a plastic freezer bag and store them in the freezer. This will also keep them sterile. When you are ready to use the cloths, rinse them under tap water to remove the stiffness.

## **Parts and Supplies:**

Samson Brands offers Pressing Clothes, Pressing Bags, Juicers, Food Washers and a full line of Healthy Kitchen Products. Give us a call or visit one of our web sites.

## **WELLES JUICE PRESS Warranty:**

### **Lifetime Warranty on the Frame**

We warrant this Welles Juice Press frame to be free of defects in material and workmanship while in normal use for life from the original date of purchase.

- If the Welles Juice Press Frame exhibits a defect while in normal household use, within the warranty period; we will, at our option, either repair or replace the Welles Juice Press Frame free of charge provided that it is delivered by insured mail, in proper packaging.\*
- To activate the warranty, the warranty registration card (see next page) with all its essential particulars must be filled in and mailed to your registration centre no later than 30 days after the original date of purchase. Alternatively, you can send all the details by email to: [mackn99@yahoo.com](mailto:mackn99@yahoo.com).

### **This warranty does not cover:**

- The hydraulic jack mechanism on the Welles Juice Press.
- Damage, accidental or otherwise, to the juicer, not caused by direct defect in factory workmanship or materials.
- Damage due to abuse, mishandling, alteration, misuse, tampering, accident, failure to follow care, operating and handling provisions indicated in the instructions.
- Damage caused by parts/service not authorized or by our service center.
- Some states do not allow the exclusion or limitation of incidental or consequential damages. So the above limitations may not apply to you in the case of damage in shipment. If your juicer was damaged in shipment: Immediately report this type of damage to the parcel carrier and have them file an inspection report to contact the distributor from whom you purchased the juicer.

Do not send your Welles Juice Press back to the service center without return authorization. In no event shall our liability exceed the retail value of the press. We make no warranty with respect to parts from a source other than Welles Juice Press. This warranty gives you specific legal rights and you may also have other rights which vary, from state to state.

To achieve the best results from your press, read and follow the instructions in your operating manual.
